How is Microsoft's sale of US6327629 based derivative Software an act of Fraud

1)   Microsoft cannot relicense the use restrictions set in the US6370629 Development Only Settlement to a third party in the form of A GENERAL RELEASE. See SECTION 8 in the PROVIDED RELEASE.

They simply cannot allow software they publish under any of their derivatives to be relicensed to any party outside the very restrictive terms of the US6370629 Section 8 mandates. Any Microsoft product offering licensing around those restrictions is counterfeit in form.

2)   Where in Microsoft products are those services used today? - in pretty much all SW Microsoft builds and sells which relies on LOCATION BASED SERVICES in one or more of its modules including but not limited to the following examples.

a)   **NTFS** – There are 8 each infringing timestamps in each FAT. Each time a file is touched, edited, created, or deleted these timestamp are updated, causing a new infringement.

b)   **Patch Management Services** – Signed Patches require verification, which uses the timestamp services to verify both the content, and the identity of the Issuer *(Microsoft or its Publisher 3rd Party SW Providers). Each use of such a signed update module will require multiple uses of US6370629 or its derivatives.

c)   **Login Module and SSO Services** – A party who logs into the SYSTEM, either locally or in the form of

d)   **AD and Policy Controllers** – Active Directory and local Platform Use Entitlement and Restrictions for Program Execution under all of the Microsoft Authority Control Models today.

e)   **MICROSOFT VM AND CLOUD SYSTEMS** – all Virtual Machine Instances rely on US6370629 IP in each of their forms for any and all timestamping and entitlement/run time controls. The VM NTFS system like the physical NTFS system relies on the same 8 timestamps per FAT File Entries.

3) Microsoft commingles money from the sale of these products outside the terms of the US6370629 Releases in all instances in with funds obtained from the Sale of those products into the Jurisdictions with fraudulently filed and abandoned instances of US6370629
